Benefits of a Service Plan:

- **Hassle-free scheduling and reminders of when you need to service your generator.**
- **Costs savings over a stand-alone service call of over \$50.00/year on average.**
- **Priority scheduling for repairs in the event of a breakdown or issue.**
- **10% labor discount on any additional maintenance required.**
- **Limited loans of job site generator to keep essentials going during a repair or while waiting for parts. (subject to availability)**
- **Qualified, authorized, trained technicians familiar with your generator and how to keep it performing its best.**

Review service contract for complete details, subject to change & availability.

Service Plan FAQ:

How often does my generator need service?

At a minimum your generator should be serviced every year. This ensures that your generator is ready to perform in the event of a power loss.

If you use your generator on a regular basis or live in an area that experiences more frequent outages, consider the semi-annual service plan for the best preventative maintenance.

Can I service my generator myself?

You can, but we find that many homeowners forget to perform service on a regular basis or are not qualified to identify all potential issues.

Does service impact my warranty from the manufacturer?

In general, your warranty can be impacted if the unit shows signs of neglect, misuse or improper maintenance. Clear service records can prevent many disputes about coverage.

Can I cancel my annual service contract?

Yes, our service contracts are meant to be a helpful reminder not a unwanted commitment. Just let us know.

What does an air-cooled service plan cost?

Annual Service Plan: \$279/yr. (+tax)

Semi-annual Service Plan: \$399/yr. (+tax)

How do I enroll?
